

**CristalGuard™** *Glass Protection*

# KEEP YOUR TIMELESS DESIGNS CLEAN AND BEAUTIFUL.

**No matter how hard you try to keep standard glass clean, eventually it gets ugly.**

Glass exposed to hard water, heat, humidity, soap and even cleaning agents can spot, discolor and corrode with normal use. Ironically, the things you use to clean your glass can actually make it look worse, no matter how hard you scrub. With CristalGuard glass, you can have a shower, backsplash or balustrade that maintains its original beauty long after initial installation.

**CristalGuard glass is incredibly easy to clean and keep beautiful.**

CristalGuard glass is a different kind of glass altogether. Its surface is protected during manufacturing through an ion beam process. This patented technology permanently seals the glass surface, stopping corrosion before it starts. Which means with just a minimal amount of cleaning, CristalGuard glass will look as gorgeous as it did the day you bought it for years to come.

**Standard glass corrodes, leaving it full of tiny pits and ridges that attract and hold scum.**

Hard water, cleaning products and even the soap and shampoo you use every day can take a toll on standard glass. Constant exposure to these contaminants causes a chemical reaction that actually roughens the surface of the glass. When that happens, spots, residues, stains and scale build up, and it becomes almost impossible to keep your glass clean.

**CristalGuard glass resists corrosion, so scum has nothing to grab on to.**

The surface of CristalGuard glass is bonded to seal the surface against attack from chemicals and shower contaminants. Which means your glass remains smooth and able to be cleaned. And unlike spray-on or wipe-on treatments that eventually come off, the coating on CristalGuard glass is permanent. So your glass stays beautiful year after year.

**Standard Glass**

*Standard glass  
exposed to typical  
shower conditions*

shower conditions*

Keeping your CristalGuard glass clean is easy. Below is a quick guide to assist you in selecting the right cleaning product for your glass:

<i>Water Quality</i>	<i>Effective Cleaners</i>	<i>Recommended Cleaners</i>	<i>Recommended Cleaning Frequency*</i>
soft water	any glass cleaner	cif glass cleaner or similar	as needed
hard water	any acidic glass cleaner	solution of 50% water and 50% vinegar	approximately once every 15 showers
hard water with dissolved silica	cleaners with mild abrasives	citrus based cleanser or anti-calcaire cleanser	approximately once every 10 showers

\* Cleaning frequency recommendations are guidelines only. Actual cleaning frequency will depend upon humidity, degree of water hardness, shower temperature, and other variables. In cases with extremely high silica content, it may be helpful to squeegee as needed between cleanings.

CristalGuard glass is covered by a 10-year limited warranty.
